

Prashant Vishwakarma

Full Stack Developer

prashantvhkm@gmail.com · +91 7620171492 · prashantvhkm.fun · github.com/prashantvhkm · linkedin.com/in/prashantvhkm

Objective

Full Stack Developer with hands-on experience across the complete web development lifecycle, from responsive front-end interfaces to RESTful backend APIs and relational databases. Passionate about delivering scalable, user-centric software and eager to contribute to cross-functional teams driving continuous improvement in modern applications.

Education

Thakur College of Commerce & Science, University of Mumbai
Bachelor of Science in Computer Science

2025
CGPA: 6.2

Technical Skills

Front-End JavaScript (ES6+), HTML5, CSS3, Bootstrap, ReactJS, React Native
Back-End Node.js, Express.js, PHP (CodeIgniter 3 / MVC), Java
Databases MySQL, MongoDB
DevOps Git, GitHub, FileZilla, VS Code, Eclipse, Postman, AJAX
Soft Skills Cross-functional collaboration, Agile/Scrum, Problem-Solving, Adaptability

Professional Experience

Junior PHP Developer

December 2025 – March 2026

AndEvent

- Built 3+ web modules using PHP (CodeIgniter 3) with MVC architecture, reducing feature delivery time by 20%.
- Optimized 10+ MySQL queries, cutting average data retrieval time by 30% across key reporting pages.
- Integrated frontend UI components with backend business logic, including server-side form validation for 5+ forms.
- Deployed updates to production servers via FileZilla with zero downtime across all release cycles.

React Native Developer Intern

September 2025 – December 2025

Centeos Technologies

- Developed 8+ cross-platform mobile screens for Android and iOS using React Native, shipped on schedule.
- Reduced UI load time by 25% by optimizing component rendering and minimizing redundant API calls.
- Validated 15+ RESTful API endpoints via Postman, achieving 100% reliable frontend-backend data exchange.
- Collaborated with backend engineers to resolve 5+ API bottlenecks, improving average response time by 40%.
- Maintained clean commit history and participated in Agile sprint reviews across a 3-month engagement.

Full Stack Developer Intern

April 2024 – June 2024

SDAC Infotech

- Developed 4+ responsive web applications using HTML5, CSS3, JavaScript, and Bootstrap frameworks.
- Designed and deployed RESTful APIs with Node.js and PHP, supporting data needs for 3+ frontend modules.
- Modeled and optimized MySQL and MongoDB schemas, improving query efficiency by 20%.
- Completed debugging and unit testing cycles using VS Code and Eclipse with zero critical bugs at launch.

Projects

Live Polling System *Tech: PHP, JavaScript, MySQL, AJAX, HTML5, CSS3*

- Launched a real-time polling platform supporting dynamic vote submission and instant result rendering.
- Engineered an admin panel for poll creation, question management, and live result monitoring.
- Applied AJAX to enable asynchronous voting, eliminating full-page reloads for a seamless experience.
- Secured vote submissions against duplicate entries and enforced data integrity within MySQL.
- Produced a fully responsive layout compatible with both mobile and desktop viewports.

Motion3D — Photo Capture & Poster Generation System *Tech: PHP, MySQL, JavaScript, HTML5, CSS3*

- Shipped a mobile-first web app enabling browser-based photo capture on iOS and Android browsers.
- Automated background removal by integrating the Remove.bg REST API into the server-side pipeline.
- Generated personalized event posters by compositing user photos onto pre-designed templates.
- Persisted user records and image paths in MySQL; handled file storage securely via PHP.
- Streamlined the user journey with automatic redirection to a template preview upon image processing.
- Provided an administrative dashboard for reviewing and managing all user submissions.

Event Management System *Tech: Java, HTML5, CSS3, XML, Tailwind CSS*

- Spearheaded a web platform that centralizes event registrations, scheduling, and venue coordination.
- Reduced manual effort by consolidating attendee communication into a single management interface.

Digital Art Gallery *Tech: PHP, MySQL, Bootstrap*

- Launched a full-stack community platform for artists to upload, showcase, and like digital artwork.
- Incorporated user authentication and a social feed to foster creator engagement.

Portfolio Website *Tech: PHP, HTML5, CSS3, Bootstrap*

- Assembled a fully responsive personal portfolio emphasizing clean design and fast page performance.

Certifications

- **JS Full Stack Developer** — SDAC Infotech

Jul 2024 – Aug 2024

Grade: A · Modules: Logic Building, Tools & Soft Skills, Responsive Web Design, Databases, Core Technologies, MERN Stack

- Linux Fundamentals
